Mumbai, India, July 17, 2010 -(PR.com)-- In just under a year since the achievement of its first milestone in Aug. 2009 the start-up loan advisory portal www.eazeeloans.com has surpassed all expectations and is proud to announce the 50,000th customer to apply online on its portal.

"Looking back and pausing to recollect the uncertain and shaky global scenario prevailing when the portal was launched a year back this is a major and monumental achievement and the success can only be attributed to the selfless and 'never say' die attitude of the entire team without whose contribution this would never have been possible. I congratulate the entire team and wish for their continued patronage and contribution to scale greater heights." So quotes the founder Mr. Subhrajeet Talukdar.

"This is a most satisfying moment and should motivate us all to break new barriers. We have plotted a fresh course and plan for the scaling new peaks and uncharted destinations. Yes currently the entire team is in a jubilant mood and the celebrations shall be long and hard and why not? This would also be the time to look back and reflect on the mistakes committed and learning from them in a positive manner," said co-founder and wife Ms. Jyoti Talukdar.

The milestone is a significant step and a reflection of the policies, practices and process ingrained and also a reflection of the consistent service and the resultant customer satisfaction.

The portal has of late been given a facelift and redesigned with a wider content and has a much more pleasant and appealing look about it. The site itself remains as easy as before to navigate and the response time is as good before.
